kukudalamadhavi4@gmail.com | (+91)7729040194 | Hyderabad , Telangana | [Linkedin](#)

Career Objective: Engineering graduate with a strong foundation in software development, specializing in building and optimizing scalable, user-centric solutions. Proven ability to apply analytical and problem-solving skills to deliver high-quality results in fast-paced, client-focused environments. Eager to contribute technical expertise and a collaborative mindset to drive innovation and customer satisfaction.

Academic Details:

COURSE	BOARD	INSTITUTION	YEAR OF PASSOUT	PERCENTAGE /CGPA
BTech	JNTUH	Sri Devi Women's Engineering College (SWEC)	2024	7.0
Senior Secondary	TSBIE	Sri Gayatri Jr college	2020	88
Matriculation	SSC	The Masters High School, Nalgonda.	2018	9.0

Technical Skills:

- **Programming Languages:** Python, Java, HTML5, CSS3, JavaScript, TypeScript
- **Frameworks & Libraries:** Django, Flask, BeautifulSoup, TensorFlow, Keras, OpenCV, NumPy, Pandas, Matplotlib, React.js, Node.js
- **Databases:** MySQL, PostgreSQL, MongoDB, SQLite, SQL
- **Cloud & DevOps:** AWS (EC2, S3), Git, Docker, RESTful APIs, Jenkins
- **AI & Machine Learning Tools:** Data Scraping, Generative AI, OpenAI, Scikit-learn, PyTorch
- **IDEs & Tools:** Visual Studio Code, PyCharm, Jupyter Notebook, Eclipse, IntelliJ IDEA
- **Testing & Automation:** Unit Testing , Selenium, Postman, Continuous Integration (CI/CD)
- **Additional Skills:** Object-Oriented Programming , Agile/Scrum Methodology, Data Structures & Algorithms, Git version control, MS Office Suite
- **Professional Development:** Mastering Generative AI, ChatGPT, Deep Learning, and NLP

Internship:

Maven Group Global — Full Stack Developer

Aug 2025 – Oct 2025

- Developed dynamic e-commerce websites and job portals by integrating front-end and back-end systems, aligning with business goals to enhance user experience.
- Contributed to building an AI-powered Financial Reports Analyzer platform with data-driven dashboards, improving financial data visualization and real-time insights for stakeholders.
- Implemented complex, interactive data visualizations using React.js and Chart.js, enabling users to analyze financial trends with ease.
- Integrated backend REST APIs with frontend filtering capabilities, ensuring seamless data flow and real-time display of financial information.
- Collaborated with client stakeholders in daily stand-up meetings to gather requirements, share progress, and ensure alignment with client needs.

Projects:

Project: Riymay – E-commerce Platform

Tech Stack: Python, Django, REST API, MySQL, AWS, Git

- Contributed to developing and maintaining the backend of an AI-powered e-commerce platform focused on personalized shopping experiences.
- Built and optimized RESTful APIs for product, user, and order management modules.
- Integrated secure payment gateways and user authentication using Django and JWT.
- Improved backend performance by optimizing database queries and caching mechanisms.
- Collaborated with frontend and UI teams to ensure smooth data flow and API integration.

Project: Job Portal Design – Interactive Web Interface

Tech Stack: HTML, CSS, JavaScript

- Developed an interactive and user-friendly job portal aimed at improving job search efficiency and user engagement through intuitive design and navigation.
- Designed & implemented **responsive web layouts** using HTML & CSS for seamless accessibility.
- Enhanced **user experience and navigation flow** through structured UI design principles.
- Integrated **interactive elements and animations** using JavaScript for better engagement.
- Focused on **clean, modern design standards** to ensure usability across devices.

Project: AI Movie Explorer – Intelligent Movie Search Agent

Tech Stack: Python, Streamlit, BeautifulSoup, Requests, IMDb Web Scraping, JSON, Regex

- Developed an AI-powered movie exploration web application that dynamically fetches and displays movie data from IMDb. The system enables users to search by language and genre, providing intelligent results with ratings, posters, and descriptions.
- Built & optimized **web scraping logic** using BeautifulSoup & regex to extract realtime movie details.
- Developed **caching & error-handling mechanisms** to improve data loading speed and reliability.
- Integrated IMDb data parsing with structured **JSON processing** for dynamic API-like responses.
- Ensured user-friendly presentation of movie details including **images, ratings, and IMDb links**.

Certifications:

- Web Development certification
- Python Course Completion Certification by Dhaaps Academy

Additional Skills:

- Strong analytical and problem-solving abilities with a quick learning aptitude.
- Team player with demonstrated leadership and multitasking skills.
- Effective verbal and written communication, essential for client interaction and solution presentation.
